**Subject:** RE: Renewal applications due soon  
**Attachments:** BR\_NPDES\_Permit\_Part\_I\_9a\_9b.pdf

**Importance:** High

John,

I am having an issues/problem submitting all application requirements for the NPDES permit for the Bad River WWTP (WI-0036587-4), I realized last night that I did not complete the Additional Monitoring Requirements in Part I, Section 9a- Grab samples for cyanide, total phenols, and parameters listed under Volatile Organic Compounds, and Hardness, Metals (total recoverable), Acid-Extractable Compounds, Base/Neutral Compounds 24-composite samples, that was supposed to be conducted in August 17 during a period of high flow. I also missed one sample stated in Section I 9 b, due last May 2017 for TKN, Nitrate plus Nitrite Nitrogen, Oil and Grease, and Total Dissolved Solids (Attachment is this section of Permit).

I went ahead in mailed in the NPDES permit application for Bad River (WWTP WI-0036587-4) today. I need guidance as how to proceed. I can take the samples I missed next week, and then resubmit the application. Please let me know how to proceed.

Thanks,  
Philip Livingston

**Subject:** Renewal applications due soon

Hi Phillip,

The National Pollutant Discharge Elimination System (NPDES) permit for the Band's three wastewater treatment plants will expire on October 31, 2018. Pursuant to 40 CFR Part 122.21(d), filing an application for reissuance of a permit is required at least 180 days prior to the expiration date of the permit, unless otherwise specified by the permitting authority.

The forms (2A and 2S) for each facility can be downloaded, filled in, printed and signed and should be submitted to me by May 4, 2018. Let me know if you have any questions.

Thanks,  
John
